

SpheroSeev compatible cells

Working with partners and customers, SpheroSeev has successfully been used with all of the following cell types. We are continuing our research regarding additional cell types and will update this list accordingly.

Cell Type	Source	Cell Definition	Cell Source
Hepatocytes - Liver	Mouse	Primary, adult	Isolation
Keratinocytes – Epidermal skin cells	Human	Primary	Isolation
HepG2 - Human liver cancer cell line	Human	Primary, fresh	Isolation
panc1 - Pancreas	Human	Cell line	ATCC
c3a - Human hepatocellular carcinoma cells	Human	Cell line, frozen	ATCC
NIH3t3 - Fibroblast	Mouse	Embryo, frozen	ATCC
I929 - Fibroblast cell line	Mouse	Cell line	ATCC
RIN-m - Beta cells pancreas	Rat	Cell line, frozen	ATCC
Ct26 - Murine colorectal carcinoma	Mouse	Cell line	ATCC
DU146 - Prostate cell line	Human	Cell line	ATCC

hMSC - Mesenchymal stem cells	Human	Primary, bone marrow	Isolation based on plate adherence
GBM - Glioblastoma multiforme	Human	NCH441 cell line	Isolation
HT1080 - Fibrosarcoma	Human	Cell line	ATCC
HCT116 - Colon colorectal carcinoma	Human	Cell line, frozen	ATCC
EOC - Epithelial ovarian cancer	Human	Primary	Isolation
SW480 - Colon adenocarcinoma	Human	Cell line, frozen	ATCC
