

## Certificate of analysis

Product Name: SpheroSeev  
Batch Number: 11

| Test                                                                        | Specification                             | Result                          |
|-----------------------------------------------------------------------------|-------------------------------------------|---------------------------------|
| Concentration (mg/ml)                                                       | 0.9-1.1 mg/ml                             | 1 mg/ml                         |
| Appearance                                                                  | Turbid dispersion                         | Turbid dispersion               |
| Sterility                                                                   | No microbial growth                       | No microbial growth             |
| % Sodium dodecyl sulfate                                                    | 0.05%-0.1%                                | 0.07%                           |
| Protein Impurities                                                          | <0.1%                                     | 0.04%                           |
| Residual DNA                                                                | <0.1%                                     | 0.08%                           |
| pH                                                                          | 5-7                                       | 5.5                             |
| Performance-spheroid test, compared to control spheroids without SpheroSeev | > 1.5-fold viability improvement at day 6 | 1.55 fold viability improvement |
